Sino-Luso International Medical Forum (Series Twenty-Seven):

Optimizing Macau's Graduate Medical Education

The 27th Sino-Luso International Medical Forum will take place from the 9th to 11th of October. This forum addresses Macau's medical education and training and is titled, "Optimizing Macau's Graduate Medical Education."

Dr. Manson Fok, Dean of Faculty of Health Sciences at MUST, and President of the Sino-Luso International Medical Forum, comments, "It is my privilege to welcome you to our medical education and training Forum. This forum will bring the best of international learning to Macau and will be developed in close partnership with regional strategic partners from Hong Kong, Greater China, the United Kingdom, USA and Australia."

Dr. Fok further states, "Macau is now on the verge of consolidating the medical education and training sectors, we are thrilled and looking forward to exchange of these experiences and innovations at this forum."

The focus of this forum also covers medical pre-vocational and post graduate years of training. Dr. Leonie Watterson, the Director of Skills Centre, Faculty of Medicine, University of Sydney, will speak about the changing environment within health care services internationally. She will also discuss how innovations are occurring in how medical education and training are provided in Australia. Further talking points entail the making of medical education and training workforce sustainable.

Dr. Fok continues, "This exciting three-day event will consist of keynotes, plenaries, workshops and scientific symposium presentations. We expect many doctors and nurses will attend and represent our Macau medical community. This forum provides the opportunities to network with nearly 500 health care professionals and gain new ideas in the medical education arena. What we are doing will play a role in effecting real changes in health care quality and patient safety issues here in the Macau SAR."

Moreover, special presentations will primarily be focused on graduate medical training. An expert from Beijing, Dr. Qianzhu Liu, will speak about her experiences in working with British Medical Association's BMJ of their digital solutions for healthcare improvement and medical education. Her colleague Dr Huili Che will speak about ethical and effective medical publications.

Dr. Fok adds, "Our medical professionals from past events in medical training see beyond walls to the possibilities on the other side. We are happy to see they are inspired and empowered by our undertaking. Ultimately, we need to show our young people in Macau a future in which everyone has the best care and health possible."

Special workshops also feature Dr. Ross Horley, adjunct lecturer at the Notre Dame University in Australia, Dr. Katie Walker, the Director and New York Health and Hospitals Corporation Simulation Program, and Professor Joeri Prost, Director of Simendo Medical in the Netherlands. These high quality workshops will also be held for both nurses and physicians at the Centre for Excellence at the Faculty of Health Science on the campus of the Macau University of Science and Technology (MUST).

Macau healthcare professionals will be able to share and learn best practices, meet with experts face to face and build international connections in this exciting event.

Launched in May 2011, the Sino-Luso International Medical Forums have trained over 5,000 local and regional doctors and nurses in robotic heart surgery, mass casualty emergency response, advanced burns treatment, esophageal cancer treatments, endoscopy and laparoscopy, simulation, difficult child-birth, toxicology, medical sonography, among many topics.

The aim is to aid Macau's frontline medical providers with the best training in order to serve the people of Macau.

The program is chaired by the Faculty of Health Sciences at MUST, the Macau Healthcare Management and Promotion Association, the National Health and Family Planning Commission (NHFPC) of the PRC, the 2.6 million member strong Chinese Medical Doctor Association in Beijing, the Health and Human Resource Development Center of the NHFPC, the Macau Dr. Stanley Ho Medical Development Foundation, and the Macau Henry Fok Foundation.

“中葡國際醫學論壇(系列二十七): 優化澳門醫學教育”

由“澳門科技大學:健康科學學院”學術主持，並由“澳門健康管理及促進學會”統籌策劃的“中葡國際醫學論壇(系列二十七): 優化澳門醫學教育”，於2015年10月9 - 11日，一連3天在澳門科技大學: 健康科學學院及澳門何鴻燊博士醫療拓展基金會舉辦。

基於澳門的特殊背景，本澳的醫療教育及持續醫學培訓相對周邊地區較為落後，誠然是一個深受社會關注的問題。因此，是次論壇邀請了一眾擁有豐富醫學教育經驗的國際專家來澳，透過研討會及工作坊與醫護人員分享現今最先進的持續醫學教育及培訓模式。致力推動學習文化，強化本澳與內地及海外醫學教育機構的合作，配合澳門特區政府方針推動澳門成為一個學習型社會。當中介紹的新型醫學課程設計，強調實用性、結合理論和實踐，以在職醫護人員為本的概念，解決在工作崗位所遇上的難題和擴大醫學發展的前景。

本會冀望學員通過本次教學活動，增進他們的醫療專業技能，從而提升本澳市民對醫療質素的信心。此外，學會深切感謝澳門基金會贊助本次活動的部分經費。
